New $3\frac{3}{4}\%$ interest on U.S. Savings Bonds

The Treasury explains why the new ones you buy and the ones you own now are better than ever

Q: How does the new $3\frac{3}{4}\%$ interest rate benefit me?

A: With Series E Bonds, the rate turns \$18.75 into \$25.00 fourteen months faster than the old rate. Your savings increase faster, because your Bonds mature in just 7 years, 9 months.

With Series H Bonds, the 10-year maturity period stays the same but more interest is paid you each six months. With both E and H Bonds the new rate works out to $2\frac{1}{2}\%$ for the first year and a half; then a guaranteed 4% each year to maturity.

Q: When did the new rate become effective?

A: June 1, 1959.

Q: Does the new rate change the Bonds I bought before June 1, 1959?

A: All older E and H Bonds pay more now—an extra $\frac{1}{4}\%$ from now on, when held to maturity. The increase takes effect in the first full interest period after June 1.

Q: Will the Bonds I own automatically earn their new rate?

A: Yes. You don't need to do a thing—just hold on to your Bonds.

Q: When my E Bonds mature, will they keep on earning interest?

A: Yes. An automatic 10-year extension privilege went into effect along with the new interest rate. This means your Bonds will automatically keep earning interest after maturity.

Q: With the new interest rate, should I cash in my old Bonds and buy new ones?

A: No. The automatic $\frac{1}{4}\%$ increase makes it unnecessary to cash in old Bonds. It is to your advantage to hold them.

Q: How are older H Bonds different from older E Bonds?

A: The chief difference is this: You buy E Bonds at full face value and the interest is paid by Treasury

check every six months for the life of the Bond. You buy E Bonds at 75% of face value and the interest accumulates to maturity. H Bonds provide income for living expenses, while E Bonds build a nest egg for the future. That's why many retired people held H Bonds and families saving for, say, a child's education, buy E Bonds.

Q: In what denominations can I buy series E and series H Bonds?

A: E Bonds: \$25 (cost \$18.75), \$50 (cost \$37.50), \$100 (cost \$75.00), \$200 (cost \$150.00), \$500 (cost \$375.00), \$1,000 (cost \$750.00), \$10,000 (cost \$7,500.00).

H Bonds: \$500, \$1,000, \$5,000, and \$10,000. They are priced at face value.

Q: How safe are U.S. Savings Bonds?

A: Savings Bonds are an absolutely riskless way to save. The United States Government guarantees the cash value of your Bonds will not drop; that it can only grow.

Q: What if my Bonds should be lost, stolen or destroyed?

A: You can't lose. Every Bond purchased is recorded by the Treasury. If anything happens to your Bonds they are replaced—free.

Q: Where can I buy Bonds?

A: Buy E Bonds at any bank—it takes only a few minutes. Buy them automatically through the Payroll Savings Plan where you work. This Plan means you can have any amount you want automatically deducted every payday. The Bonds you buy by installment are delivered to you automatically, too. Your bank will take your order for H Bonds.

Q: How do I help strengthen America's peace power when I buy U.S. Savings Bonds?

A: Every cent you save—money for military strength, for science, for industry saved by individuals—helps keep our economy strong.

YOU SAVE MORE THAN MONEY WITH U. S. SAVINGS BONDS

**Kill this pellitory weed
in sugar cane.
Use Atrazine. Here's how:**

When you see pellitory weed starting to grow, apply Atrazine 80W herbicide, plus a little surfactant. You'll clean out infestations of this winter annual fast and effectively ... without hurting cane.

Atrazine is safe to sugar cane. It will not injure your crop when you apply it as directed on the label. And since it's non-volatile, there's no danger of drift to adjacent, sensitive crops.

Even though Atrazine has proved to control pellitory at any stage of growth, early treatment assures best results. With pellitory under control early, you grow more sugar cane per acre.

That's because Atrazine prevents

pellitory from interfering with sugar cane tillering. Also, Atrazine helps make soil moisture and nutrients available for your cane, and not for pellitory weed.

So plan now to grow the maximum tonnage of sugar cane from each acre you plant this season. Just use Atrazine to control pellitory weed this winter.

Taylor Circle Holds Its Monthly Meet

The Alberta Taylor Circle of the Canal Point Baptist Church held their regular monthly meeting at the home of Mrs. Coleman Conley in Indiantown on Monday night. The meeting was a surprise house-warming.

The circle went as a group and stopped at the home of Mrs. Conley's mother, Mrs. J. J. Walker, in Indiantown and took her to the meeting. Those attending were Mrs. Charles Brown, Mrs. Raymond Martin, Mrs. Milton Cumpston, Mrs. Leroy Brantley, Mrs. Guy Thompson, Mrs. Lawrence Stewart and Mrs. Robert Arrieta. Delicious home made apple pie, ice cream and coffee was served to the guests. The evening was closed with a circle prayer at which time each one remembered the Conleys and the new life they would have in their new home in Indiantown. Many lovely gifts were received by Mrs. Conley.

Mrs. L. M. Mullis has returned to her home following surgery at Everglades Memorial Hospital.

Schroder Circle Meeting

The Vena Mae Schroder Circle of the First Methodist Church met in the social hall of the church with Mrs. J. L. Tyson serving as hostess. The new chairman for next year will be Mrs. Peggy Hatton.

Mrs. Tyson was in charge of the program which was taken from John 15. She related ideas that went with the scripture.

Three new members were welcomed into the club. They were Mrs. Marion Hatton, Mrs. Kay Blankenship and Mrs. Judy Walker. There was one guest at the meeting, Mrs. McCoy, Mrs. Blankenship's mother.

The members reported on the Girl Scout troop they are sponsoring. There are 11 members and the girls that move away in the summer are eligible to participate in the troop that is active wherever they move.

CARD OF THANKS

To you, once again, our wonderful friends, we wish to thank you for all your kindnesses extended to us during the time Arch has been laid up. The many cards, the beautiful flowers, messages, visits, food transportation and blood donors have meant so very much to all of us. It's so nice to live in a town like this where 4 and 5 year-olds are concerned because the daddy of the house is ill. I love to live in a town like this. Just a little ole town like this. Where every anguish in one's breast

Is felt and shared by friends, the best. They share the pain and share the kiss. In a little ole town like this. I love to live in a town like this. Just a little ole town like this. Where your foe of today is your friend tomorrow. Who is eager to bear the cross of sorrow. And make it as light as the morning mist. In a little ole town like this. God bless Pahokee.

Arch, Fred, Robina Blakey

APPRECIATION

I wish to express my sincere appreciation to my friends for their cards, calls, flowers, prayers and other thoughtful acts of kindness during my stay in the hospital. May God bless each of you.

A message from the Treasury of a free people

How to speak out for freedom today

Free men have never gone in much for silence. Even before the first thirteen States became United States, men were speaking for freedom loud and clear.

Today Americans speak out for freedom many ways—in Congress, in local government, in neighborhood activities. Some speak out for freedom in other languages, in other lands. And millions of Americans speak out for freedom every time they buy U.S. Savings Bonds.

Every Savings Bond you buy is an investment in freedom. While you're saving money for your

own family's future, you're helping Uncle Sam tend to the business of keeping men free today.

Perhaps you don't speak out for freedom in the same tone of voice when you buy a Bond as Patrick Henry did in his famous speech. But you speak every bit as surely. And every bit as proudly.

Why not speak out for freedom now? Buy Bonds at the bank or on the Payroll Savings Plan where you work.

Keep freedom in your future with
